Date:	ABLLS-R REINFORCER EFFECTIVENESS									Name:						
A1 Take reinforcer offered																
Takes quickly																
Takes all the time																
	•	•														
A2 Take reinforcer from 2																
Takes quickly																
Takes all the time																
A3 Look at non-reinforcer																
Requires prompts																
Readily finds and looks	_															
readily initial and looks																
A4 Take common object																
Takes quickly																
Takes all the time																
A5 Approach/respond reinforce																
occasionally one response																
readily variety single response	-															
readily multiple response 1:1 sit multiple response 1:1 VR																
sit multiple response 1:1 VR																
A6 Work for reinforcer																
1 maintenance response for 1																
2 maintenance responses for 2																
3 maintenance responses for 3																
4 maintenance responses for 4																
5 maintenance responses for 5																
1 acquisition response for 1																
2 acquisition responses for 2																
3 acquisition responses for 3																
4 acquisition responses for 4																
5 acquisition responses for 5																
A7 Respond mult instructors																
3+ instructors																
novel instructors																
A8 Waits without touching																
one P no touching																
no touching oriented no P													<u> </u>			
A9 Look instructor instruction																
look instructor one P																
look instructor no P																
A40 Coon its !!																
A10 Scan items then respond																
Scan 3 items in 3 seconds	-	-											\longmapsto			
Scan 6 items in 3 seconds																
A11 Respond quickly																
5 seconds																
3 seconds																

A12 Variation in reinforcers												
1 item effective as reinforcer												
2 items effective												
3 items effective												
4 items effective									\vdash			
5 items effective												
6 items effective												
7 items effective												
8 items effective												
9 items effective												
10 items effective												
A13 Intermittent reinforcers												
1 maintenance response for 1												
2 maintenance responses for 1		\vdash		\vdash	\vdash	<u> </u>		 		\vdash		
3 maintenance responses for 1		\vdash				-						
4 maintenance responses for 1		\vdash		\vdash	\vdash	 		 		\vdash		
5 maintenance responses for 1		\vdash						 		\vdash		
1 acquisition response for 1												
2 acquisition responses for 1								\vdash	\vdash	\vdash		
3 acquisition responses for 1			\longrightarrow					\vdash	\vdash	\vdash		
4 acquisition responses for 1												
5 acquisition responses for 1				\vdash				\vdash	\vdash			\vdash
3 acquisition responses for 1	ш											
A14 Instruct interact reinforce												
2 maintenance responses												
4 maintenance responses	\vdash			$\vdash \vdash \vdash$						$\vdash \vdash$		
2 acquisition and 3 maintain												
5 acquisition responses												
A15 Look change expression												
occasionlly exaggerated												
Looks 70% of time												
A16 Respond social reinforce												
Praise for 3 responses backup												
Praise for 5 mins with backup												
Praise for 15 mins with backup												
Praise only for 15 mins work												
A17 Wait for reinforcer												
5 seconds		\sqcup		igsqcut				<u> </u>	<u> </u>	igsquare		
10 seconds		\sqcup						<u> </u>	<u> </u>			
1 minute								<u> </u>	<u> </u>			
5 minutes									<u> </u>			
A40 Octobrate de alle annuelle												
A18 Seeks task approval Looks to see if others notice												
				, i	,			1 '		,	1 1
